PREPARATIONS

Upper G.I. Series/Barium Swallow:
 Nothing to eat or drink after 11:00 pm on the day prior to the test including the morning of appointment
 No smoking or chewing gum for 8 hours prior to the appointment time

Small Bowel Follow Through (alone or in combination with Upper G.I. Series/Barium Swallow:
One Day prior to test:
 12:00 noon eat a low residue lunch (Clear soup, chicken or tuna sandwich on white bread without lettuce, jello, skim/1% milk)
 6 hours prior to taking CITROMAG, drink a full glass of clear fluid every hour (water, pop, apple juice, Gatorade)
 4:00 pm take one bottle of CITROMAG
Thereafter, drink plenty of clear fluids every hour and after each bowel movement
Morning of Exam
 Nothing to eat or drink
 No smoking or chewing gum for 8 hours prior to the appointment time

Barium Enema and IVP:
Two Days prior to test:
 Eat a low residue lunch and dinner (Clear soup, chicken or tuna sandwich on white bread without lettuce, jello, skim/1% milk)
One Day prior to test:
 At 10:00 am start drinking a full glass of clear fluid every hour.
 4:00 pm take one bottle of CITROMAG
Thereafter, drink plenty of clear fluids every hour and after each bowel movement.
If results of the CITROMAG laxative are poor, take one or two oral DULOCLAX tablets prior to bedtime
Morning of Exam:
 DO NOT EAT. Drink 4-8 ounces of water, apple juice or Gatorade.

Mammography/OBSP:
 Avoid caffeine 24-48 hrs. prior to the test. Do not use deodorant, body lotion, powder or perfume in the regions of the breast or underarms on the day of the test. If your breasts are sensitive during your menstrual cycle, avoid booking the test at that time.

CT:
 Head (brain) and Lumbar Spines do not require preparation. For all other inquiries, please call ext. 2000.
